

Vesticam App (version 4.0)

A **Vesticam Compatible Recorder** is an Android device included with the Vesticam package. The **Vesticam App** and other tools are pre-installed, tested and ready for use.

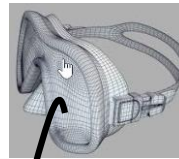

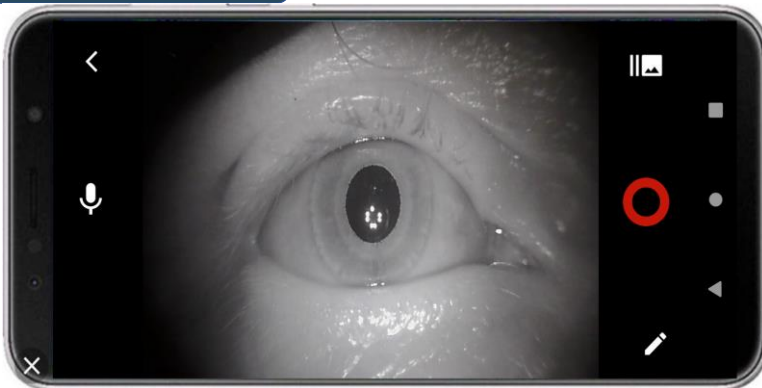

The Vesticam App (version:4.0) enables clinicians to **"View from Camera"**. The App is custom designed to enable clinicians to easily view real time and record patient eye movement using the Vesticam IR video goggles.

The **Video Library** enables searching, replaying (at normal or half speed), renaming, and sharing of patient video recordings.

Vesticam recordings can be easily shared, transferred or archived [see www.vesticam.com]
